

SAINTY Panoramic Multi-track Sliding Door

Full name: Aluminum Panoramic Multi-tranck Sliding Door With Motor

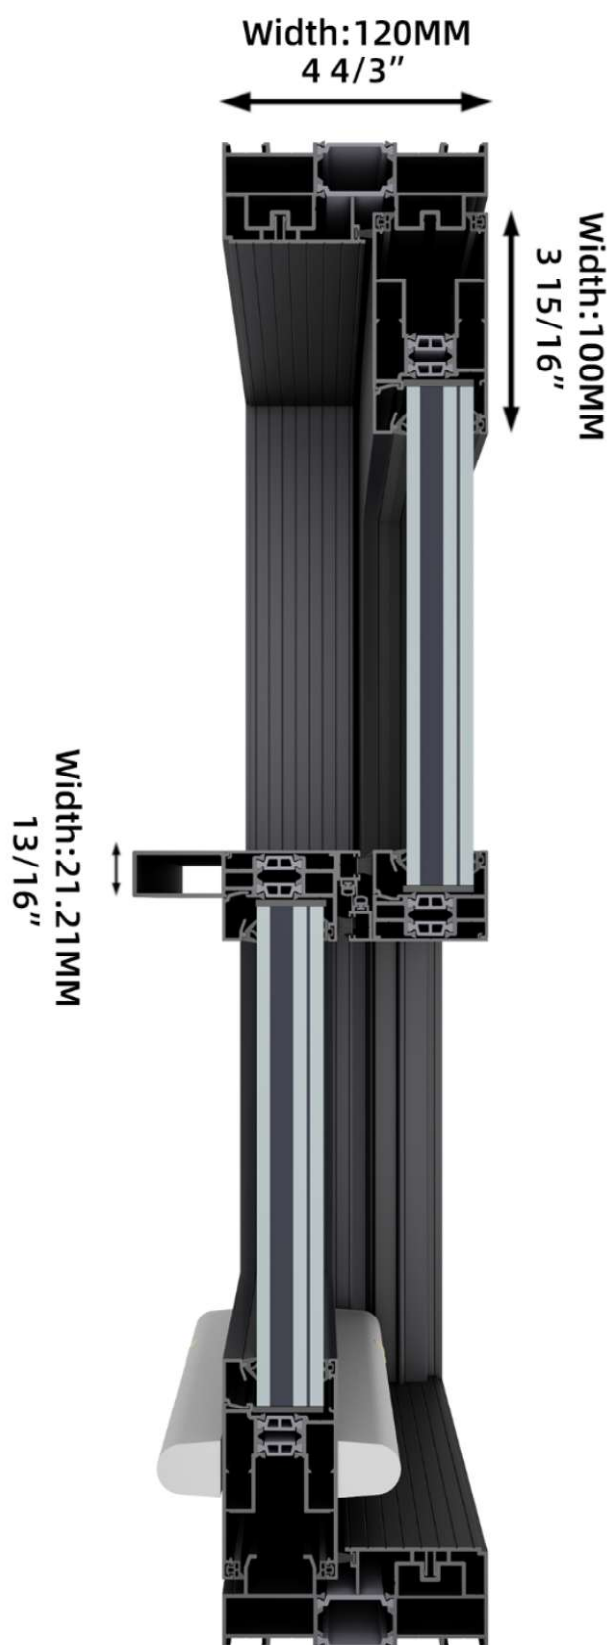

- Whole Door dimensions up to 7000 mm wide and 3000 mm high.

Automatic sliding doors are convenient and user-friendly. They can be operated with the push of a button, a sensor, or a remote control, making them accessible to people of all ages and abilities.

Multi-track sliding doors save space because they don't swing open or shut like traditional hinged doors. This makes them an excellent choice for areas with limited space, such as balconies or small patios.
